

## INDEX TO VOLUME 297 (A)

- Angular overlap model applied to chiral chromophores and the parentage interrelation of absolute configurations (discussion) (Schäffer), 96.
- Annulenes, Review Lecture (Sondheimer), 173.
- Ashcroft, N. W. & March, N. H. Structure factor and direct correlation function for a classical hard sphere fluid, 336.
- Bamford, C. H. & Hargreaves, K. Studies in polymerization. XVII. The initiation of vinyl polymerization by tetrakis (triphenyl phosphite) nickel (0), 425.
- Bhatnagar, P. L. *See* Devanathan & Bhatnagar.
- Bessent, R. G., Hayes, W. & Hodby, J. W. Paramagnetic resonance and electron nuclear double resonance of substitutional hydrogen atoms in  $\text{CaF}_2$ , 376.
- Bosnich, B. Stereospecific induction (discussion), 88.
- Brahms, J. Circular dichroism of helical polynucleotide chains (discussion), 150.
- Carboxyl and aromatic chromophores: optical rotatory dispersion and circular dichroism studies (discussion) (Klyne), 66.
- Circular dichroism and configuration of complexes of amino acids (discussion) (Gillard), 134.
- Circular dichroism of helical polynucleotide chains (discussion) (Brahms), 150.
- Circular dichroism of polypeptides (discussion) (Gratzer), 163.
- Closing remarks to a discussion (Ingold), 171.
- Collision broadening and shift in the  $\lambda 6573$  line of calcium (Smith), 288.
- Construction of singularity-free spherically symmetric space-time manifolds (Künzle), 244.
- Cookson, R. C. Some coupled chromophores (discussion), 27.
- Corrigenda for Volume 291, 424.
- De Haas-van Alphen effect and Fermi surface of ordered alloys of the  $\beta$  brass type (Jan, Pearson & Saito), 275.
- Devanathan, C. & Bhatnagar, P. L. Flow induced in a cylindrical column by a uniformly rotating magnetic field, 558.
- Diagonal cubic equations and inequalities (Pitman & Ridout), 476.
- Discussion on circular dichroism: electronic and structural principles (Nyholm and others), 2.
- Dobbs, E. R. *See* Perz & Dobbs.
- Dowker, J. S. A wave equation for massive particles of arbitrary spin, 351.
- Effect of ring size and conformation on the rotatory strength of tris-(bidentate) complexes (discussion) (Woldbye), 79.
- Effects of uniaxial stress and electric fields on localized vibrational modes of  $\text{H}^-$  and  $\text{D}^-$  ions in  $\text{CaF}_2$  (Hayes & Macdonald), 503.
- Emeis, C. A., Oosterhoff, L. J. & de Vries, Gonda. Numerical evaluation of Kramers-Kronig relations (discussion), 54.
- Evans, B. L. & Young, P. A. Optical properties of arsenic trisulphide, 230.
- Far infra-red spectra of charge-transfer complexes between iodine and substituted pyridines (Lake & Thompson), 440.
- Ferromagnetic domain structure in haematite (Gustard), 269.
- Flow induced in a cylindrical column by a uniformly rotating magnetic field (Devanathan & Bhatnagar), 558.

- General principles (discussion) (Mason), 3.
- Gillard, R. D. Circular dichroism and configuration of complexes of amino acids (discussion), 134.
- Gratzer, W. B. Circular dichroism of polypeptides (discussion), 163.
- Gustard, B. The ferromagnetic domain structure in haematite, 269.
- Hargreaves, K. *See* Bamford & Hargreaves.
- Hartley, D. B. & Thrush, B. A. The rates of elementary processes in the chain reaction between hydrogen and oxygen. III. Kinetics of the combination of hydrogen atoms with nitric oxide, 520.
- Hayes, W. *See* Bessent, Hayes & Hodby.
- Hayes, W. & Macdonald, H. F. Effects of uniaxial stress and electric fields on localized vibrational modes of  $H^-$  and  $D^-$  ions in  $CaF_2$ , 503.
- Hayward, D. O., King, D. A. & Tompkins, F. C. Sticking probabilities, heats of adsorption and redistribution processes of nitrogen on tungsten films at 195 and 290° K, 305.
- Hayward, D. O., King, D. A. & Tompkins, F. C. Variation of sticking probabilities with temperature and coverage, and desorption spectra for nitrogen on tungsten films, 321.
- Hindmarsh, W. R., Petford, A. D. & Smith, G. Interpretation of collision broadening and shift in atomic spectra, 296.
- Hodby, J. W. *See* Bessent, Hayes & Hodby.
- Identification and some physico-chemical consequences of non-basal edge and screw dislocations in graphite (Roscoe & Thomas), 397.
- Ingold, Sir Christopher. Closing remarks to a discussion, 171.
- Interpretation of collision broadening and shift in atomic spectra (Hindmarsh, Petford & Smith), 296.
- Introductory remarks to a discussion (Nyholm), 2.
- Jan, J.-P., Pearson, W. B. & Saito, Y. De Haas-van Alphen effect and Fermi surface of ordered alloys of the  $\beta$  brass type, 275.
- Johnson, J. W. *See* Proctor, Whitney & Johnson.
- King, D. A. *See* Hayward, King & Tompkins.
- Klyne, W. Carboxyl and aromatic chromophores: optical rotatory dispersion and circular dichroism studies (discussion), 66.
- Künzle, H. P. Construction of singularity-free spherically symmetric space-time manifolds, 244.
- Lake, R. F. & Thompson, H. W. Far infra-red spectra of charge-transfer complexes between iodine and substituted pyridines, 440.
- Laidler, K. J. & Liu, M. T. H. The mechanism of the acetaldehyde pyrolysis, 365.
- Liu, M. T. H. *See* Laidler & Liu.
- Low temperature circular dichroism: conformational effects (discussion) (Snatzke), 43.
- Macdonald, H. F. *See* Hayes & Macdonald.
- McLachlan, A. D. Optical rotation in helical polymers (discussion), 141.
- March, N. H. *See* Ashcroft & March.
- Mason, S. F. General principles (discussion), 3.
- Mechanism of the acetaldehyde pyrolysis (Laidler & Liu), 365.
- Miles, J. W. Surface-wave damping in closed basins, 459.
- Moscowitz, A. Some comments on the relevance of charge transfer for the 300 nm transition in  $\beta$ ,  $\gamma$  unsaturated ketones (discussion), 40.

- Moscowitz, A. Some remarks on the interpretation of natural and magnetically induced optical activity data (discussion), 16.
- Numerical evaluation of Kramers–Kronig relations (discussion) (Emeis, Oosterhoff & de Vries), 54.
- Nyholm, R. S. and others. A discussion on circular dichroism: electronic and structural principles, 2.
- Nyholm, R. S. Introductory remarks to a discussion, 2.
- Optical properties of arsenic trisulphide (Evans & Young), 230.
- Optical rotation in helical polymers (discussion) (McLachlan), 141.
- Oosterhoff, L. J. *See* Emeis, Oosterhoff & de Vries.
- Paramagnetic resonance and electron nuclear double resonance of substitutional hydrogen atoms in  $\text{CaF}_2$  (Bessent, Hayes & Hodby), 376.
- Pearson, W. B. *See* Jan, Pearson & Saito.
- Pekeris, C. L. Wave theory intrinsic to seismology, 449.
- Perz, J. M. & Dobbs, E. R. Ultrasonic attenuation in white tin crystals, 408.
- Petford, A. D. *See* Hindmarsh, Petford & Smith.
- Pitman, Jane & Ridout, D. Diagonal cubic equations and inequalities, 476.
- Proctor, B. A., Whitney, I. & Johnson, J. W. The strength of fused silica, 534.
- Rates of elementary processes in the chain reaction between hydrogen and oxygen. III. Kinetics of the combination of hydrogen atoms with nitric oxide (Hartley & Thrush), 520.
- Review Lecture. The annulenes (Sondheimer), 173.
- Ridout, D. *See* Pitman & Ridout.
- Roscoe, C. & Thomas, J. M. The identification and some physico-chemical consequences of non-basal edge and screw dislocations in graphite, 397.
- Saito, Y. *See* Jan, Pearson & Saito.
- Schäffer, C. E. The angular overlap model applied to chiral chromophores and the parentage interrelation of absolute configurations (discussion), 96.
- Smith, D. A. Tipping effects in Azbel–Kaner cyclotron resonance, 205.
- Smith, G. Collision broadening and shift in the  $\lambda 6573$  line of calcium, 288.
- Smith, G. *See also* Hindmarsh, Petford & Smith.
- Snatzke, G. Low temperature circular dichroism: conformational effects (discussion), 43.
- Some comments on the relevance of charge transfer for the 300 nm transition in  $\beta$ ,  $\gamma$  unsaturated ketones (discussion) (Moscowitz), 40.
- Some coupled chromophores (discussion) (Cookson), 27.
- Some remarks on the interpretation of natural and magnetically induced optical activity data (discussion) (Moscowitz), 16.
- Sondheimer, F. Review Lecture. The annulenes, 173.
- Stereospecific induction (discussion) (Bosnich), 88.
- Sticking probabilities, heats of adsorption and redistribution processes of nitrogen on tungsten films at 195 and 290 °K (Hayward, King & Tompkins), 305.
- Strength of fused silica (Proctor, Whitney & Johnson), 534.
- Structure factor and direct correlation function for a classical hard sphere fluid, (Ashcroft & March), 336.
- Studies in polymerization. XVII. The initiation of vinyl polymerization by tetrakis (triphenyl phosphite) nickel (0) (Bamford & Hargreaves), 425.
- Surface-wave damping in closed basins (Miles), 459.

- Thomas, L. M. *See* Roscoe & Thomas.
- Thompson, H. W. *See* Lake & Thompson.
- Thrush, B. A. *See* Hartley & Thrush.
- Tipping effects in Azbel–Kaner cyclotron resonance (Smith), 205.
- Tompkins, F. C. *See* Hayward, King & Tompkins.
- Ultrasonic attenuation in white tin crystals (Perz & Dobbs), 408.
- Variation of sticking probabilities with temperature and coverage, and desorption spectra for nitrogen on tungsten films (Hayward, King & Tompkins), 321.
- de Vries, Gonda. *See* Emeis, Oosterhoff & de Vries.
- Wave equation for massive particles of arbitrary spin (Dowker), 351.
- Wave theory intrinsic to seismology (Pekeris), 449.
- Whitney, I. *See* Proctor, Whitney & Johnson.
- Woldbye, F. The effect of ring size and conformation on the rotatory strength of tris-(bidentate) complexes (discussion), 79.
- Young, P. A. *See* Evans & Young.
