

R. D. PINGREE

A shallow subtropical subducting westward propagating eddy (Swesty)

L. BREVDO & T. J. BRIDGES

Absolute and convective instabilities of spatially periodic flows

S. TANVEER

Asymptotic calculation of three-dimensional thin-film effects on unsteady Hele–Shaw fingering

S. MAYBANK

Finite-dimensional filters

R. WESTAWAY

Quaternary elevation change of the Gulf of Corinth in central Greece

A. GONZÁLEZ-LÓPEZ, N. KAMRAN & P. OLVER

Real Lie algebras of differential operators and quasi-exactly solvable potentials

A. SELLIER

Application of the Hadamard's finite part concept to the asymptotic expansion of a class of multidimensional integrals

Series A Volume 452 Number 1950 8 July 1996**CONTENTS**

I. YU. POPOV	<i>pages</i> 1505–1515
The extension theory, domains with semitransparent surface and the model of quantum dot	
P. N. SAHAY	1517–1529
Elastodynamics of deformable porous media	
L. UBY	1531–1543
Strings, rods, vortices and wave equations	
H. XIAO	1545–1561
On anisotropic scalar functions of a single symmetric tensor	
Y. ZHANG & S. ZHU	1563–1584
A comparison study of nonlinear waves generated behind a semicircular trench	
G. BOLING & H. YONGQIAN	1585–1595
Remarks on the generalized Kadomtsev–Petviashvili equations and two-dimensional Benjamin–Ono equations	
R. M. J. WATSON & B. R. JENNINGS	1597–1608
The size dependence of the electrical polarizability anisotropy of aqueous colloids	
J. ZHOU & N. SAFFARI	1609–1630
Absorbing boundary conditions for elastic media	
R. S. LANGLEY	1631–1648
A transfer matrix analysis of the energetics of structural wave motion and harmonic vibration	
J. B. LAWRIE & I. D. ABRAHAMS	1649–1677
Travelling waves on a membrane: reflection and transmission at a corner of arbitrary angle. II	
L. MAHADEVAN & J. B. KELLER	1679–1694
Coiling of flexible ropes	
R. V. CRASTER	1695–1711
A canonical problem for fluid–solid interfacial wave coupling	
R. W. ZIMMERMAN	1713–1727
Effective conductivity of a two-dimensional medium containing elliptical inhomogeneities
