|-------|-------|----------|---|
| Price | £1.00 | £1.05 | T |

This handbook contains in a convenient form a very great deal of information on SI (the International System of Units), symbols for physical quantities, recommended forms for many aspects of scientific writing including mathematical presentation, labelling of graphs and tables, preferred placements and type fonts for subscripts and superscripts, favoured abbreviations, etc. It also includes recommended values of physical constants. While SI and other internationally recommended practices are emphasized, values of conversion factors are given for use with imperial units and other units outside SI. References to original international authority are quoted.

Its compact size makes *Quantities, Units, and Symbols* an invaluable aid to scientific writing for all authors who wish to follow modern practice especially in physics and chemistry. Equally it should be an immediately available guide for teachers in higher education many of whom will wish their students to own a copy. It is also invaluable for the reader who has found some unfamiliar notation or terminology, not least when he has strayed from his own narrow specialism.

The contents include:

- Physical quantities and symbols for physical quantities
- Units and symbols for units
- Numbers
- Recommended mathematical symbols
- Chemical elements, nuclides, and particles
- Quantum states
- Nuclear physics
- Thermodynamic results
- Galvanic cells
- Some common abbreviations
- Recommended values of physical constants
- Sources
- Bibliography

To encourage the widespread availability and use of Q.U.S. (as it is commonly known) the following special prices are offered for orders for multiple copies:

| | U.K. | Overseas |
|-----------|--------|----------|
| 5 copies | £4.00 | £4.15 |
| 10 copies | £6.50 | £6.70 |
| 20 copies | £11.00 | £11.35 |
| 50 copies | £22.50 | £23.20 |

6 Carlton House Terrace, London SW1Y 5AG

CONTENTS

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| HUXLEY, SIR ANDREW Address of the President at the Anniversary Meeting, 30 November 1983 | pages 383-398 |
| HEATH, O. V. S. Stomatal opening in darkness in the leaves of <i>Commelina communis</i> , attributed to an endogenous circadian rhythm: control of phase | 399-414 |
| CHIU, S. Y. & RITCHIE, J. M. On the physiological role of internodal potassium channels and the security of conduction in myelinated nerve fibres | 415-422 |
| DUNSTAN, R. H., GREENAWAY, W. & WHATLEY, F. R. The metabolism of [1- ¹³ C]-glucose by <i>Paracoccus denitrificans</i> , investigated by gas chromatography-mass spectrometry | 423-437 |
| MALKOVSKÝ, M., MEDAWAR, SIR PETER, HUNT, RUTH, PALMER, LESLEY & DORÉ, CAROLINE A diet enriched in vitamin A acetate or <i>in vivo</i> administration of interleukin-2 can counteract a tolerogenic stimulus | 439-445 |
| DAVENPORT, J., MUNKS, SARAH, A. & OXFORD, P. J. A comparison of the swimming of marine and freshwater turtles. [Plates 1-4] | 447-475 |
| ROBELLO, M., ROLANDI, R., ALEMÀ, S. & GRASSO, A. <i>trans</i> -Bilayer orientation and voltage-dependence of α -latrotoxin- induced channels | 477-487 |
| SHELTON, G. A. B. & HOLLEY, M. C. The role of a 'local electrical conduction system' during feeding in the Devonshire cup coral <i>Caryophyllia smithii</i> Stokes and Broderip | 489-500 |
| VANEY, D. I. 'Coronate' amacrine cells in the rabbit retina have the 'starburst' dendritic morphology. [Plate 1] | 501-508 |
| WILKINSON, C. R. Immunological evidence for the Precambrian origin of bacterial symbioses in marine sponges | 509-517 |
| WILKINSON, C. R., GARRONE, R. & VACELET, J. Marine sponges discriminate between food bacteria and bacterial symbionts: electron microscope radioautography and <i>in situ</i> evidence. [Plate 1] | 519-528 |
| Instructions to Authors | 529-532 |
| INDEXES | 533-537 |
