

*The Royal Society
of London*

H.C. Wolfenden del et sc.

London 1945

PHILOSOPHICAL
TRANSACTIONS
OF THE
ROYAL SOCIETY OF LONDON.

SERIES A.

CONTAINING PAPERS OF A MATHEMATICAL OR PHYSICAL CHARACTER.

VOL. 209.

LONDON:

PRINTED BY HARRISON AND SONS, ST. MARTIN'S LANE, W.C.,

Printers in Ordinary to His Majesty.

OCTOBER, 1909.

CONTENTS.

(A)

VOL. 209.

List of Illustrations	page vi
Advertisement	vii

I. <i>On the Atomic Weight of Chlorine.</i> By EDWARD C. EDGAR, D.Sc., the University, Manchester. Communicated by Prof. H. B. DIXON, F.R.S.	page 1
II. <i>On Scandium.</i> By Sir WILLIAM CROOKES, D.Sc., F.R.S.	15
III. <i>The Spectrum of Scandium, and its Relation to Solar Spectra.</i> By A. FOWLER, A.R.C.S., F.R.A.S., Assistant Professor of Physics, Imperial College of Science and Technology, South Kensington. Communicated by Sir WILLIAM CROOKES, D.Sc., F.R.S.	47
IV. <i>On the Nature of the Streamers in the Electric Spark.</i> By S. R. MILNER, D.Sc. (Lond.), Lecturer in Physics in the University of Sheffield. Communicated by Prof. W. M. HICKS, F.R.S.	71
V. <i>Eutectic Research.—No. 1. The Alloys of Lead and Tin.</i> By WALTER ROSENHAIN, B.A., B.C.E., with P. A. TUCKER. (From the National Physical Laboratory.) Communicated by R. T. GLAZEBROOK, M.A., F.R.S.	89
VI. <i>The Emission and Transmission of Röntgen Rays.</i> By G. W. C. KAYE, B.A. (Cantab.), B.Sc. (Lond.), A.R.C.Sc., Associate-Member of the Institution of Electrical Engineers, Trinity College, Cambridge. Communicated by Prof. J. J. THOMSON, F.R.S.	123

- VII. *Memoir on the Theory of the Partitions of Numbers.—Part IV. On the Probability that the Successful Candidate at an Election by Ballot may never at any time have Fewer Votes than the One who is Unsuccessful; on a Generalization of this Question; and on its Connexion with other Questions of Partition, Permutation, and Combination.* By Major P. A. MACMAHON, F.R.S. page 153
- VIII. *On the Osmotic Pressures of Aqueous Solutions of Calcium Ferrocyanide.—Part I. Concentrated Solutions.* By the EARL OF BERKELEY, F.R.S., E. G. J. HARTLEY, B.A. (Oxon.), and C. V. BURTON, D.Sc. (Lond.) 177
- IX. *The Effect of Pressure upon Arc Spectra.—No. 2. Copper, λ 4000 to λ 4600.* By W. GEOFFREY DUFFIELD, D.Sc., Honorary Research Fellow in Physics at the University of Manchester, Mackinnon Student of the Royal Society. Communicated by Prof. E. RUTHERFORD, F.R.S. 205
- X. *Results of Magnetic Observations at Stations on the Coasts of the British Isles, 1907.* By Commander L. W. P. CHETWYND, R.N., Superintendent of Compasses. Communicated by Rear-Admiral A. M. FIELD, F.R.S. . . . 227
- XI. *The Mobilities of the Ions produced by Röntgen Rays in Gases and Vapours.* By E. M. WELLISCH, M.A. (Sydney), Emmanuel College, Cambridge; Barker Graduate Scholar of the University of Sydney. Communicated by Prof. Sir J. J. THOMSON, F.R.S. 249
- XII. *Determination of the Surface-Tension of Water by the Method of Jet Vibration.* By N. BOHR, Copenhagen. Communicated by Sir WILLIAM RAMSAY, K.C.B., F.R.S. 281
- XIII. *On the Osmotic Pressures of Calcium Ferrocyanide Solutions.—Part II. Weak Solutions.* By the EARL OF BERKELEY, F.R.S., E. G. J. HARTLEY, B.A. (Oxon.), and J. STEPHENSON, B.Sc. (Lond.) 319
- XIV. *On the Spontaneous Crystallisation of Monochloroacetic Acid and its Mixtures with Naphthalene.* By Principal HENRY A. MIERS, F.R.S., and Miss FLORENCE ISAAC, Research Fellow of Somerville College, Oxford . . . 337
- XV. *On the Electricity of Rain and its Origin in Thunderstorms.* By GEORGE C. SIMPSON, D.Sc. Communicated by Dr. GILBERT T. WALKER, F.R.S. . 379

XVI. *Functions of Positive and Negative Type, and their Connection with the Theory of Integral Equations.* By J. MERCER, B.A., Trinity College, Cambridge. Communicated by Prof. A. R. FORSYTH, Sc.D., LL.D., F.R.S. . . . page 415

XVII. *The Spectrum of Magnesium Hydride.* By A. FOWLER, A.R.C.S., F.R.A.S., Assistant Professor of Physics, Imperial College of Science and Technology, South Kensington. Communicated by Prof. H. L. CALLENDAR, M.A., LL.D., F.R.S. 447

Index to Volume 479

LIST OF ILLUSTRATIONS

Plate I.—The *William Crookes* on Bismuth

Plate II.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate III.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate IV.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate V.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate VI.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate VII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate VIII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate IX.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate X.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XI.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XIII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XIV.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XV.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XVI.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XVII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XVIII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XIX.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XX.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXI.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXIII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXIV.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXV.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXVI.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXVII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXVIII.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXIX.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

Plate XXX.—The *W. Crookes* on the Nature of the Spectrum in the Electric Spark

LIST OF ILLUSTRATIONS.

Plate 1.—Sir WILLIAM CROOKES on Scandium.

Plates 2-4.—Dr. S. R. MILNER on the Nature of the Streamers in the Electric Spark.

Plates 5-9.—Messrs. WALTER ROSENHAIN and P. A. TUCKER: Eutectic Research.—
No. 1. The Alloys of Lead and Tin.

Plates 10, 11.—Dr. W. GEOFFREY DUFFIELD on the Effect of Pressure upon Arc
Spectra.—No. 2. Copper, λ 4000 to λ 4600.

Plates 12, 13.—Prof. A. FOWLER on the Spectrum of Magnesium Hydride.

ADVERTISEMENT.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions* take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume; the Society, as a Body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind: the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body,

upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.
