

INDEX TO VOLUME 243 (A)

- Aberrations of magnetic electron lenses due to asymmetries (Sturrock), 387.
- Analysis of the geomagnetic secular variation (Lowe & Runcorn), 525.
- Bambah, R. P. On the geometry of numbers of non-convex star-regions with hexagonal symmetry, 431.
- Barnett, M. P. & Coulson, C. A. The evaluation of integrals occurring in the theory of molecular structure. Parts I and II, 221.
- Bates, D. R., Fundaminsky, A., Leech, J. W. & Massey, H. S. W. Excitation and ionization of atoms by electron impact—the Born and Oppenheimer approximations. Part II, 117.
- Bates, D. R., Fundaminsky, A. & Massey, H. S. W. Excitation and ionization of atoms by electron impact—the Born and Oppenheimer approximations. Part I, 93.
- Baxendale, J. H. & Enüstün, B. V. A thermodynamical investigation of the system benzene-diphenyl. Part II, 176.
- Baxendale, J. H. & Enüstün, B. V. A thermodynamical investigation of the system benzene-diphenyl. Part III, 182.
- Baxendale, J. H. & Enüstün, B. V. A thermodynamical investigation of the system benzene-diphenyl. Part IV, 192.
- Baxendale, J. H., Enüstün, B. V. & Stern, J. A thermodynamical investigation of the system benzene-diphenyl. Part I, 169.
- Brooks, R., Clark, L. M. & Thurston, E. F. Calcium carbonate and its hydrates, 145.
- Bullard, E. C., Freedman, Cynthia, Gellman, H. & Nixon, Jo. The westward drift of the earth's magnetic field, 67.
- Burton, W. K., Cabrera, N. & Frank, F. C. The growth of crystals and the equilibrium structure of their surfaces, 299.
- Cabrera, N. *See* Burton, Cabrera & Frank.
- Calcium carbonate and its hydrates (Brooks, Clark & Thurston), 145.
- Cassels, J. W. S., Ledermann, W. & Mahler, K. Farey section in $k(i)$ and $k(\rho)$, 585.
- Clark, L. M. *See* Brooks, Clark & Thurston.
- Coulson, C. A. *See* Barnett & Coulson.
- Crystal growth (Burton, Cabrera & Frank), 299.
- Downs, D., Walsh, A. D. & Wheeler, R. W. A study of the reactions that lead to 'knock' in the spark-ignition engine, 463.
- Earth's magnetic field (Bullard, Freedman, Gellman & Nixon), 67.
- Elasto-viscous systems (Garner, Nissan & Wood), 37.
- Enüstün, B. V. *See* Baxendale & Enüstün; also Baxendale, Enüstün & Stern.
- Evaluation of integrals occurring in the theory of molecular structure. Parts I and II (Barnett & Coulson), 221.
- Excitation and ionization of atoms by electron impact—the Born and Oppenheimer approximations. Part I (Bates, Fundaminsky & Massey), 93.
- Excitation and ionization of atoms by electron impact—the Born and Oppenheimer approximations. Part II (Bates, Fundaminsky, Leech & Massey), 117.
- Farey section in $k(i)$ and $k(\rho)$ (Cassels, Ledermann & Mahler), 585.
- Frank, F. C. *See* Burton, Cabrera & Frank.
- Freedman, Cynthia. *See* Bullard, Freedman, Gellman and Nixon.
- Fundaminsky, A. *See* Bates, Fundaminsky, Leech & Massey; also Bates, Fundaminsky & Massey.
- Garner, F. H., Nissan, A. H. & Wood, G. F. Thermodynamics and rheological behaviour of elasto-viscous systems under stress, 37.
- Gellman, H. *See* Bullard, Freedman, Gellman & Nixon.
- Geometry of numbers of non-convex star-regions with hexagonal symmetry (Bambah), 431.
- Growth of crystals and the equilibrium structure of their surfaces (Burton, Cabrera & Frank), 299.
- Isotropic turbulence (Stewart & Townsend), 359.
- 'Knock' in the spark-ignition engine (Downs, Walsh & Wheeler), 463.

- Large elastic deformations of isotropic materials. VII. Experiments on the deformation of rubber (Rivlin & Saunders), 251.
- Large elastic deformations of isotropic materials. VIII. Strain distribution around a hole in a sheet (Rivlin & Thomas), 289.
- Ledermann, W. *See* Cassels, Ledermann & Mahler.
- Leech, J. W. *See* Bates, Fundaminsky, Leech & Massey.
- Longuet-Higgins, M. S. A theory of the origin of microseisms, 1.
- Lowes, F. J. & Runcorn, S. K. The analysis of the geomagnetic secular variation, 525.
- Mahler, K. *See* Cassels, Ledermann & Mahler.
- Massey, H. S. W. *See* Bates, Fundaminsky, Leech & Massey; *also* Bates, Fundaminsky & Massey.
- Microseisms, theory of origin (Longuet-Higgins), 1.
- Molecular structure (Barnett & Coulson), 221.
- Nissan, A. H. *See* Garner, Nissan & Wood.
- Nixon, Jo. *See* Bullard, Freedman, Gellman & Nixon.
- Photoconductivity in the infra-red region of the spectrum. Part I. The preparation and properties of photoconductive films of lead telluride (Simpson & Sutherland), 547.
- Photoconductivity in the infra-red region of the spectrum. Part II. The mechanism of photoconductivity in lead telluride (Simpson), 564.
- Rivlin, R. S. & Saunders, D. W. Large elastic deformations of isotropic materials. VII. Experiments on the deformation of rubber, 251.
- Rivlin, R. S. & Thomas, A. G. Large elastic deformations of isotropic materials. VIII. Strain distribution around a hole in a sheet, 289.
- Runcorn, S. K. *See* Lowes & Runcorn.
- Saunders, D. W. *See* Rivlin & Saunders.
- Similarity and self-preservation in isotropic turbulence (Stewart & Townsend), 359.
- Simpson, O. Photoconductivity in the infra-red region of the spectrum. Part II. The mechanism of photoconductivity in lead telluride, 564.
- Simpson, O. & Sutherland, G. B. B. M. Photoconductivity in the infra-red region of the spectrum. Part I. The preparations and properties of photoconductive films of lead telluride, 547.
- Stern, J. *See* Baxendale, Enüstün & Stern.
- Stewart, R. W. & Townsend, A. A. Similarity and self-preservation in isotropic turbulence, 359.
- Study of a high-current toroidal ring discharge (Ware), 197.
- Study of the reactions that lead to 'knock' in the spark-ignition engine (Downs, Walsh & Wheeler), 463.
- Sturrock, P. A. The aberrations of magnetic electron lenses due to asymmetries, 387.
- Sutherland, G. B. B. M. *See* Simpson & Sutherland.
- Theory of the origin of microseisms (Longuet-Higgins), 1.
- Thermodynamical investigation of the system benzene-diphenyl. Part I (Baxendale, Enüstün & Stern), 169.
- Thermodynamical investigation of the system benzene-diphenyl. Part II (Baxendale & Enüstün), 176.
- Thermodynamical investigation of the system benzene-diphenyl. Part III (Baxendale & Enüstün), 182.
- Thermodynamical investigation of the system benzene-diphenyl. Part IV (Baxendale & Enüstün), 192.
- Thermodynamics and rheological behaviour of elasto-viscous systems under stress (Garner, Nissan & Wood), 37.
- Thomas, A. G. *See* Rivlin & Thomas.
- Thurston, E. F. *See* Brooks, Clark & Thurston.
- Toroidal ring discharge (Ware), 197.
- Townsend, A. A. *See* Stewart and Townsend.
- Walsh, A. D. *See* Downs, Walsh & Wheeler.
- Ware, A. A. A study of a high-current toroidal ring discharge, 197.
- Westward drift of the earth's magnetic field (Bullard, Freedman, Gellman & Nixon), 67.
- Wheeler, R. W. *See* Downs, Walsh & Wheeler.
- Wood, G. F. *See* Garner, Nissan & Wood.

THE UNIVERSITY PRESS, CAMBRIDGE

CONTENTS

Series A. Volume 243

A theory of the origin of microseisms. By M. S. LONGUET-HIGGINS.	<i>page</i> 1
Thermodynamics and rheological behaviour of elasto-viscous systems under stress. By F. H. GARNER, A. H. NISSAN AND G. F. WOOD	37
The westward drift of the earth's magnetic field. By E. C. BULLARD, F.R.S., CYNTHIA FREEDMAN, H. GELLMAN and JO NIXON	67
Excitation and ionization of atoms by electron impact—the Born and Oppenheimer approximations. Part I. By D. R. BATES, A. FUNDAMINSKY and H. S. W. MASSEY, F.R.S. Part II. By D. R. BATES, A. FUNDAMINSKY, J. W. LEECH and H. S. W. MASSEY, F.R.S.	93
Calcium carbonate and its hydrates. By R. BROOKS, L. M. CLARK and E. F. THURSTON. (Plate 1)	145
A thermodynamical investigation of the system benzene-diphenyl. Part I. By J. H. BAXENDALE, B. V. ENÜSTÜN and J. STERN. Parts II, III and IV. By J. H. BAXENDALE and B. V. ENÜSTÜN	169
A study of a high-current toroidal ring discharge. By A. A. WARE, Ph.D. (Plates 2 and 3)	197
The evaluation of integrals occurring in the theory of molecular structure. Parts I and II. By M. P. BARNETT and C. A. COULSON, F.R.S.	221
Large elastic deformations of isotropic materials. VII. Experiments on the deformation of rubber. By R. S. RIVLIN and D. W. SAUNDERS. VIII. Strain distribution around a hole in a sheet. By R. S. RIVLIN and A. G. THOMAS	251
The growth of crystals and the equilibrium structure of their surfaces. By W. K. BURTON, N. CABRERA and F. C. FRANK	299
Similiarity and self-preservation in isotropic turbulence. By R. W. STEWART and A. A. TOWNSEND	359
The aberrations of magnetic electron lenses due to asymmetries. By P. A. STURROCK	387
On the geometry of numbers of non-convex star-regions with hexagonal symmetry. By R. P. BAMBAH	431
A study of the reactions that lead to 'knock' in the spark-ignition engine. By D. DOWNS, A. D. WALSH and R. W. WHEELER	463
The analysis of the geomagnetic secular variation. By F. J. LOWES and S. K. RUNCORN	525
Photoconductivity in the infra-red region of the spectrum. Part I. The preparation and properties of photoconductive films of lead telluride. By O. SIMPSON and G. B. B. M. SUTHERLAND, F.R.S. Part II. The mechanism of photoconductivity in lead telluride. By O. SIMPSON	547
Farey section in $k(i)$ and $k(\rho)$. By J. W. S. CASSELS, W. LEDERMANN and K. MAHLER, F.R.S.	585

ADVERTISEMENT

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions* take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume; the Society, as a body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind: the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them: without pretending to answer for the certainty of the facts, or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.
