Subject Index

- Archaean craton of North Atlantic, 493.
Archaean crustal evolution, 317.
Automated shipyard, 151.
- Canadian shield: Proterozoic continental margin, 547.
Convection cells in Archaean, 457.
Crustal development in the Precambrian, 321.
- Decay of a large amplitude wave in an elastic slab, 261.
Designer's response from the owner's side, 45.
Design methodology of ships, 85.
Design procedures (for ships) and their implementation, 119.
Diffraction of pulses from statistically rough surfaces, 611.
Dome development, West Greenland, 535.
- Early Precambrian gneisses of the Godthåb district, West Greenland, 343.
Earth, liquid core dynamics, 237.
Engineering systems, future, for naval ships, 129.
Environmental and regulatory aspects of design and operation of ships, 35.
- Flat-lying structure, West Greenland, 535.
Forward view of British shipping, 5.
- Geochemistry of granulite facies rocks and problems of their origin, 429.
Granulites in reworked terrains, 443.
Green function for the simple cubic lattice, 583.
Greenland, West, the early Precambrian gneisses of the Godthåb district, 343.
- Hydrodynamics and ship performance – developments likely in ship technology in the 1980s, 77.
- Integrated approach to design and production of ships, 99.
Internationally, shipping is a growth industry, 5.
- Limpopo belt, structure of northern margin, 487.
Limpopo mobile belt – southern Africa, 463.
Liquid core of the Earth, 237.
- Materials, progress and prospects in materials for ship structures, 61.
Melting and granulite formation, 457.
Mobile belts, Proterozoic contrasting Greenland, 513.
- Naval ships, future engineering systems for, 129.
North Atlantic craton, 493.
Nozzle design criteria for removing the thrust malalignment arising from non-symmetric gas flow in rocket motors, 185.
- Plate tectonics: A plate tectonic for the Archaean Crust, 413.
Precambrian crustal development, 321.
Propulsion: future propulsion systems for merchant ships, 137.
Proterozoic continental margin: northwestern Canadian shield, 547.
- Reflexion and transmission of a large amplitude pulse at an interface between two elastic materials, 261.
Regulation of design and operation of ships, 35.
Response of the designer from the owner's side, 45.
Reworking of gneiss complexes, 443.
Rhodesian granites, 389.
Rhodesian greenstone belts, 389.
- Shear zones, 200 km right lateral displacement along northern margin of Limpopo orogenic belt, 487.
Shipbuilding in the future, 13.
Ship design methodology, 85.

- Ship operations in the 1980s, 23.
Ship safety – effects of future developments in ship technology, 77.
Ships: future propulsion systems for merchant ships, 137.
1980s shipyard, 151.
Shipyards of the future: possibilities and prospects, 173.
Southern Africa, early Precambrian crustal evolution, 359.
Southern Africa – Limpopo mobile belt, 463.
Statistical properties of echoes diffracted from rough surfaces, 611.
Structures, progress and prospects for ship structures, 61.
- Tectonics, Archaean, 413.
Tectonic displacements and thermal activity in two contrasting Proterozoic mobile belts from Greenland, 513.

CONTENTS

Series A Volume 273

A Discussion on ship technology in the 1980s. Organized by SIR JAMES LIGHTHILL, F.R.S., F. B. BOLTON and R. HURST	page 1
Non-symmetric flow in Laval type nozzles. By A. G. WALTERS (Plates 1 to 3)	185
Dynamics of the liquid core of the Earth. By C. L. PEKERIS and Y. ACCAD	237
Large amplitude waves in bounded media I. Reflexion and transmission of large amplitude shockless pulses at an interface. By H. M. CEKIRGE and E. VARLEY	261
A Discussion on the evolution of the Precambrian crust. Organized by J. SUTTON, F.R.S. and B. F. WINDLEY (Plates 4 to 14)	315
On the simple cubic lattice Green function. By G. S. JOYCE	583
The statistical properties of echoes diffracted from rough surfaces. By M. V. BERRY	611

PAPERS RECENTLY PUBLISHED IN
 PHILOSOPHICAL TRANSACTIONS OF THE
 ROYAL SOCIETY, SERIES A

		U.S.A.	
No. 1218	Determination of the structure of the atmosphere between 90 and 250 km by means of contaminant releases at Woomera, May 1968 By D. REES, R. G. ROPER, K. H. LLOYD and C. H. LOW	£1.20	\$3.35
No. 1219	Rapid force-flux transitions in highly porous membranes By P. MEARES and K. R. PAGE	£1.20	\$3.35
No. 1220	Model equations for long waves in nonlinear dispersive systems By T. B. BENJAMIN, F.R.S., J. L. BONA and J. J. MAHONY	£0.85	\$2.35
No. 1221	A Discussion on problems associated with the subsidence of southeastern England Organized by K. B. DUNHAM, F.R.S. and D. A. GRAY	£5.00	\$14.00
No. 1222	Coordinate perturbation and multiple scale in gasdynamics By L. CROCCO	£0.75	\$2.10
No. 1223	On resistive instabilities By P. BALDWIN and P. H. ROBERTS	£0.75	\$2.10
No. 1224	Two-dimensional problems of electrohydrostatic stability By D. H. MICHAEL and M. E. O'NEILL	£0.75	\$2.10
No. 1225	Circular islands as resonators of long-wave energy By W. SUMMERFIELD	£1.10	\$3.10
No. 1226	The motion of a vortex filament with axial flow By D. W. MOORE and P. G. SAFFMAN	£0.70	\$1.95
No. 1227	A kinematic theory of large magnetic Reynolds number dynamos By A. M. SOWARD	£0.85	\$2.35
No. 1228	Limit analysis for plates: a simple loading problem involving a complex exact solution By E. N. FOX	£0.80	\$2.25
No. 1229	A Discussion on building technology in the 1980s Organized by SIR JAMES LIGHTHILL, F.R.S., K. W. PEPPER and P. L. BAKKE	£4.40	\$12.30
No. 1230	Kinematic dynamo models By P. H. ROBERTS	£1.00	\$2.80
No. 1231	A Discussion on ship technology in the 1980s Organized by SIR JAMES LIGHTHILL, F.R.S., F. B. BOLTON and R. HURST	£4.70	\$13.15
No. 1232	Non-symmetric flow in Laval type nozzles By A. G. WALTERS	£1.60	\$4.50
No. 1233	Dynamics of the liquid core of the Earth By C. L. PEKERIS and Y. ACCAD	£0.65	\$1.80

BIOGRAPHICAL MEMOIRS OF FELLOWS
OF THE ROYAL SOCIETY

Volume 18, 1972

Price £8.00; U.S.A. \$22.40

For some years now the Royal Society has arranged that after the death of a Fellow or Foreign Member a careful appreciation by a colleague be prepared so that an account of the deceased's life and work is placed on permanent record. Every memoir in the annual volume of Biographical Memoirs contains an account of the subject's life and a portrait, and provides an assessment of his contributions to new knowledge. In addition, each contains a bibliography of the subject's writings and is thus a valuable element in any library used by students and scientific research workers.

These memoirs constitute an authoritative record of some of the most important developments in science and of the men responsible for them.

Volume 18 contains memoirs of the following:

Edward Neville da Costa Andrade	Christopher Kelk Ingold
Horace Newton Barber	Hans Kronberger
John Barker	Leslie William Mapson
John Boyd Orr—Baron Boyd Orr of Brechin Mearns	Ronald Sydney Nyholm
Herbert McLean Evans	Leonard Bessemer Pfeil
Emmanuel Fauré-Fremiet	Harold Raistrick
George Ingle Finch	David Alymer Scott
Sydney John Folley	Frank Edward Smith
Charles Robert Harington	Richard Vynne Southwell
Geoffrey Wingfield Harris	Arthur Stoll
Hildebrand Wolfe Harvey	The Svedberg
	Otto Heinrich Warburg
