## CONTENTS

## Time-resolved macromolecular crystallography

A Discussion organized by D. W. J. Cruickshank,

J. R. Helliwell, L. N. Johnson, K. Moffat and Sir David Phillips, and edited by  
D. W. J. Cruickshank, J. R. Helliwell and L. N. Johnson

- D. W. J. CRUICKSHANK  
Time-resolved macromolecular crystallography: introducing remarks and a little history 169–173
- K. MOFFAT, Y. CHEN, K. NG, D. MCRREE & E. D. GETZOFF  
Time-resolved crystallography: principles, problems and practice 175–190
- G. L. ROSSI, A. MOZZARELLI, A. PERACCHI & C. RIVETTI  
Time course of chemical and structural events in protein crystals measured by microspectrophotometry 191–207
- H. D. BARTUNIK, L. J. BARTUNIK & H. VIEHMANN  
Time-resolved X-ray diffraction studies of enzymes under cryoconditions 209–220
- J. R. HELLIWELL  
Synchrotron X-ray crystallography techniques: time-resolved aspects of data collection 221–232
- J. E. T. CORRIE, Y. KATAYAMA, G. P. REID, M. ANSON & D. R. TRENTHAM  
The development and application of photosensitive caged compounds to aid time-resolved structure determination of macromolecules 233–244
- E. M. H. DUKE, A. HADFIELD, S. WALTERS, S. WAKATSUKI, R. K. BRYAN & L. N. JOHNSON  
Time-resolved diffraction studies on glycogen phosphorylase *b* 245–261
- A. SCHEIDIG, E. F. PAI, I. SCHLICHTING, J. E. T. CORRIE, G. P. REID, A. WITTINGHOFFER & R. S. GOODY  
Time-resolved crystallography on H-ras p21 263–272
- D. RINGE, B. L. STODDARD, J. BRUHNKE, P. KOENIGS & N. PORTER  
Can Laue catch Maxwell?: observation of short-lived species by Laue X-ray crystallography 273–284
- P. T. SINGER, R. P. CARTY, L. E. BERMAN, I. SCHLICHTING, A. STOCK, A. SMALÅS, Z. CAI, W. F. MANGEL, K. W. JONES & R. M. SWEET  
Laue diffraction as a tool in dynamic studies: hydrolysis of a transiently stable intermediate in catalysis by trypsin 285–300
- A. LILJAS, M. CARLSSON, K. HÅKANSSON, M. LINDAHL, S. A. SVENSSON & A. WEHNERT  
Laue and monochromatic crystallography on carbonic anhydrase 301–309
