Theo Murphy meeting issue: Spatial transformations: from fundamentals to applications

	Article ID		Article ID
INTRODUCTION			
Spatial transformations: from fundamentals to applications R Foster, P Grant, Y Hao, A Hibbins, T Philbin and R Sambles	20140365	Manufacture of electrical and magnetic graded and anisotropic materials for novel manipulations of microwaves PS Grant, F Castles, Q Lei, Y Wang, JM Janurudin, D Isakov, S Speller, C Dancer and CRM Grovenor	20140353
ARTICLES			
Spatial transformation-enabled electromagnetic devices: from radio frequencies to optical wavelengths ZH Jiang, JP Turpin, K Morgan, B Lu and DH Werner	20140363	Metasurface transformation for surface wave control E Martini, M Mencagli Jr and S Maci	20140355
A new look at the transformation electromagnetics approach for some real-world applications R Mittra and Y Zhou	20140356	Metasurfaces for general transformations of electromagnetic fields SA Tretyakov	20140362
Transformation optics beyond the manipulation of light trajectories V Ginis and P Tassin	20140361	Graded metascreens to enable a new degree of nanoscale light management N Mohammadi Estakhri, C Argyropoulos and A Alù	20140351
Experiments on cloaking in optics, thermodynamics and mechanics M Kadic, T Bückmann, R Schittny and M Wegener	20140357	Watching surface waves in phononic crystals OB Wright and O Matsuda	20140364
Two cases of spatial transformations MG Silveirinha, CD Giovampaola and N Engheta	20140352	On cosmology in the laboratory U Leonhardt	20140354
Spatially variant periodic structures in electromagnetics RC Rumpf, JJ Pazos, JL Digaum and SM Kuebler	20140359	Experimental model of topological defects in Minkowski space–time based on disordered ferrofluid: magnetic monopoles, cosmic strings and the space–time cloak II Smolyaninov, VN Smolyaninova and AI Smolyaninov	20140360
