- I. *On the Causes and Ecological Significance of Stomatal Frequency, with Special Reference to the Woodland Flora.* By E. J. SALISBURY, D.Sc., F.L.S., Reader in Plant Ecology in the University of London, University College. Communicated by Prof. F. W. OLIVER, F.R.S. page 1
- II. *The Corallian Rocks of Oxford, Berks and North Wilts.* By W. J. ARKELL, B.A., B.Sc., F.G.S., Burdett-Coutts Scholar, Oxford University, 1925-27. Communicated by Prof. W. J. SOLLAS, F.R.S. 67
- III. *The Bionomics of Certain Air-Breathing Fishes of India, together with an Account of the Development of their Air-Breathing Organs.* By B. K. DAS, M.Sc., F.R.M.S., U.P. State Scholar, Imperial College of Science and Technology, London. Communicated by Prof. E. W. MACBRIDE, F.R.S. 183
- IV. *Structure and Function of the Organs of Feeding and Digestion in the Septibranchs, Cuspidaria and Poromya.* By C. M. YONGE, D.Sc., Ph.D. (Edin.), Balfour Student in the University of Cambridge. Communicated by Dr. E. J. ALLEN, F.R.S. 221

V. <i>On the Ear Region of Certain of the Chrysochloridæ.</i> By C. FORSTER COOPER, M.A., Superintendent of the University Museum of Zoology, Cambridge. Communicated by Prof. J. L. WILSON, F.R.S.	265
VI. <i>On the Evolution of the Vertebral Column in Birds, illustrated by its Development in Larus and Struthio.</i> By JOHANNES PIIPER, Professor of Zoology and Comparative Anatomy in the University of Tartu (Dorpat), Estonia. Communicated by Prof. E. W. MACBRIDE, F.R.S.	285
VII. <i>On the Dictyoxylon Cortex of Lycopodiales as a Constituent of Coal.</i> By CLARENCE A. SEYLER. Communicated by Dr. D. H. SCOTT, F.R.S.	353
VIII. <i>On the Embryology of a Mysid Crustacean, Hemimysis Lamornæ.</i> By S. M. MANTON, M.A., F.L.S., Demonstrator in Comparative Anatomy in the University of Cambridge. Communicated by J. STANLEY GARDINER, F.R.S.	363
<i>Index to Volume</i>	465
<i>Errata</i>	466

LIST OF ILLUSTRATIONS.

- Plates 1 and 2 and Map.—W. J. ARKELL on the Corallian Rocks of Oxford, Berks and North Wilts.
- Plates 3-11.—B. K. DAS on the Bionomics of Certain Air-Breathing Fishes of India, together with an Account of the Development of their Air-Breathing Organs.
- Plates 12-14.—C. M. YONGE on the Structure and Function of the Organs of Feeding and Digestion in the Septibranchs, *Cuspidaria* and *Poromya*.
- Plates 15-17.—C. FORSTER COOPER on the Ear Region of Certain of the Chrysochloridæ.
- Plate 18.—JOHANNES PIIPER on the Evolution of the Vertebral Column in Birds, illustrated by its Development in *Larus* and *Struthio*.
- Plates 19 and 20.—CLARENCE A. SEYLER on the *Dictyoxyton* Cortex of Lycopodiales as a Constituent of Coal.
- Plates 21-25.—S. M. MANTON on the Embryology of a Mysid Crustacean, *Hemimysis Lamornæ*.

A D V E R T I S E M E N T.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions* take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume; the Society, as a Body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind: the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them: without pretending to answer for the certainty of the facts, or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body,

upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.
