OF THE

## ROYAL SOCIETY OF LONDON

SERIES B

VOLUME 226

BIOLOGICAL SCIENCES

LONDON

Printed and published for the Royal Society  
By Harrison & Sons, Ltd., 44-47, St. Martin's Lane

1936

## CONTENTS

Series B                      Volume 226

- I. On the Structure of the Skull in the Mammal-like Reptiles of the Suborder Therocephalia. By R. BROOM, F.R.S. (Plates 1—9) . . . . . page 1
- II. Studies in Tunicate Development. Part V.—The Evolution and Classification of Ascidians. By N. J. BERRILL . . . . . 43
- III. Reproduction of the Bank Vole (*Evotomys glareolus*, SCHREBER). I.—The Oestrous Cycle of the Female. By F. W. ROGERS BRAMBELL and I. W. ROWLANDS. (Plates 10—15) . . . . . 71
- IV. On the Tooth-replacement in Theriodont Reptiles. By F. R. PARRINGTON . . . . . 121
- V. Studies on the Epidermal Structures of Birds. By ANNE HOSKER. (Plates 16—28) . . . . . 143
- VI. The British Silurian Rugose Corals with Acanthine Septa. By DOROTHY HILL. (Plates 29 and 30) . . . . . 189
- VII. On the Factors which Influence the External Form of Fossil Plants ; with Descriptions of the Foliage of Some Species of the Palaeozoic Equisetalean Genus *Annularia* Sternberg. By JOHN WALTON. (Plates 31 and 32) . . . . . 219

VIII. Genetical and Taxonomic Investigations in the Genus <i>Oenothera</i> . By R. RUGGLES GATES, F.R.S. . . . .	239
IX. The Influence of Moonlight on the Activity of Certain Nocturnal Insects, Particularly of the Family Noctuidae, as Indicated by a Light Trap. By C. B. WILLIAMS . . . . .	357
X. Studies on the Embryology of the African Migratory Locust, <i>Locusta migratoria migratorioides</i> R. and F. I.—The Early Develop- ment, with a New Theory of Multi-phased Gastrulation Among Insects. By MITHAN LAL ROONWAL. (Plates 33—35)	391
XI. The Croonian Lecture—Sexual Periodicity and the Causes Which Determine It. By F. H. A. MARSHALL, F.R.S. . . . .	423
XII. Factors Affecting the Amount of Infection Obtained by Aphis Transmission of the Virus Hy. III. By MARION A. WATSON (HAMILTON) . . . . .	457

## ADVERTISEMENT

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions* take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume ; the Society, as a Body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind : the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions* ; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them : without pretending to answer for the certainty of the facts, or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society ; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices ; which in some instances have been too lightly credited, to the dishonour of the Society.

INDEX TO VOLUME 226 (B)

- BERRILL, N. J. Studies in Tunicate development. V—The evolution and classification of Ascidians, 43.
- Birds, studies on the epidermal structures of (HOSKER), 143.
- BROOM, R. On the structure of the skull in the mammal-like reptiles of the suborder Thercephalia, 1.
- Corals, British Silurian rugose (HILL), 189.
- Croonian Lecture, Sexual periodicity and causes which determine it (MARSHALL), 423.
- Fossil plants, external form of (WALTON), 219.
- HILL, DOROTHY. The British Silurian rugose corals with acanthine septa, 189.
- HOSKER, ANNE. Studies on the epidermal structures of birds, 143.
- Infection by aphid transmission, factors affecting (WATSON), 457.
- Insects, nocturnal, activity of (WILLIAMS), 357.
- Locust, African migratory, embryology of (MITHAN LAL ROONWAL), 391.
- MARSHALL, F. H. A. The Croonian Lecture. Sexual periodicity and the causes which determine it, 423.
- Oenothera*, investigations in the genus (RUGGLES GATES), 239.
- PARRINGTON, F. R. On the tooth-replacement in theriodont reptiles, 121.
- ROGERS BRAMBELL, F. W., and ROWLANDS, I. W. Reproduction of the bank vole (*Eutamias glareolus*, SCHREBER). I—The oestrous cycle of the female, 71.
- ROONWAL, MITHAN LAL. Studies on the embryology of the African migratory locust, *Locusta migratoria migratorioides* R. and F. I—The early development, with a new theory of multi-phased gastrulation among insects, 391.
- ROWLANDS, I. W. See ROGERS BRAMBELL and ROWLANDS.
- RUGGLES GATES, R. Genetical and taxonomic investigations in the genus *Oenothera*, 239.
- Sexual periodicity and causes which determine it. Croonian Lecture (MARSHALL), 423.

Theriodont reptiles, tooth-replacement in (PARRINGTON), 121.

Therocephalia, structure of skull in (BROOM), 1.

Tunicate development, V (BERRILL), 43.

Vole, bank, oestrous cycle of female (ROGERS BRAMBELL and ROWLANDS), 71.

WALTON, JOHN. On the factors which influence the external form of fossil plants ; with descriptions of the foliage of some species of the Palaeozoic equisetalean genus *Annularia* Sternberg, 219.

WATSON, MARION A. (HAMILTON). Factors affecting the amount of infection obtained by aphis transmission of the virus Hy. III, 457.

WILLIAMS, C. B. The influence of moonlight on the activity of certain nocturnal insects, particularly of the family Noctuidae, as indicated by a light trap, 357.

*End of the two hundred and twenty-sixth volume—Series B.*
