

INDEX TO VOLUME 227 (B)

- Aboriginal Australian, brain of (SHELLSHEAR), 293.
- Cerebral morphology, study in (SHELLSHEAR), 293.
- Downtonian of England and Wales, plant-remains from (LANG), 245.
- Flea, rat, internal anatomy of the larva of (SHARIF), 465.
- HEATLEY, N. G. *See* MANTON and HEATLEY.
- LANG, W. H. On the plant-remains from the Downtonian of England and Wales, 245.
- Locust, African migratory, studies on the embryology of (MITHAN LAL ROONWAL), 175.
- MADWAR, S. Biology and morphology of the immature stages of Mycetophilidae (*Diptera*, *Nematocera*), 1.
- MANTON, S. M. Studies on the Onychophora. II—The feeding, digestion, excretion, and food storage of *Peripatopsis*; with biochemical estimations and analyses by N. G. HEATLEY, 411.
- Marthasterias glacialis* (L.), nervous system of (SMITH), 111.
- Mycetophilidae (*Diptera*, *Nematocera*), biology and morphology of (MADWAR), 1.
- Nosopsyllus fasciatus* (Bosc), internal anatomy of (SHARIF), 465.
- Onychophora, studies on (MANTON and HEATLEY), 411.
- Peripatopsis*, feeding, digestion, excretion, and food storage of (MANTON and HEATLEY), 411.
- ROONWAL, MITHAN LAL. Studies on the embryology of the African migratory locust, *Locusta migratoria migratorioides* Reiche and Frm. (*Orthoptera*, *Acrididae*). II—Organogeny, 175.
- SHARIF, M. On the internal anatomy of the larva of the rat-flea, *Nosopsyllus fasciatus* (Bosc), 465.
- SHELLSHEAR, J. L. The brain of the aboriginal Australian. A study in cerebral morphology, 293.
- SMITH, J. E. On the nervous system of the starfish *Marthasterias glacialis* (L.), 111.
- STARFISH, nervous system of the (SMITH), 111.

1937

## CONTENTS

Series B                      Volume 227

- I. Biology and Morphology of the Immature Stages of Mycetophilidae  
(*Diptera, Nematocera*). By S. MADWAŃ . . . . . page 1
- II. On the Nervous System of the Starfish *Marthasterias glacialis* (L.).  
By J. E. SMITH . . . . . 111
- III. Studies on the Embryology of the African Migratory Locust, *Locusta  
migratoria migratorioides* Reiche and Frm. (Orthoptera, Acridi-  
didae). II — Organogeny. By MITHAN LAL ROONWAL  
(Plates 1—7) . . . . . 175
- IV. On the Plant-remains from the Downtonian of England and Wales.  
By WILLIAM H. LANG, F.R.S. (Plates 8—14) . . . . . 245
- V. The Brain of the Aboriginal Australian. A Study in Cerebral  
Morphology. By JOSEPH L. SHELLSHEAR. (Plates 15—37) . . . . . 293
- VI. Studies on the Onychophora. II—The Feeding, Digestion, Excre-  
tion, and Food Storage of *Peripatopsis*. By S. M. MANTON,  
with Biochemical Estimations and Analyses by N. G. HEATLEY.  
(Plates 38—40) . . . . . 411
- VII. On the Internal Anatomy of the Larva of the Rat-Flea, *Nosopsyllus  
fasciatus* (Bosc). By M. SHARIF . . . . . 465

## ADVERTISEMENT

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions* take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume ; the Society, as a Body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind : the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions* ; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them : without pretending to answer for the certainty of the facts, or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society ; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices ; which in some instances have been too lightly credited, to the dishonour of the Society.
