

INDEX TO VOLUME 230 (B)

- Anthocyanins, distribution in flowers, fruits and leaves (Lawrence, Price and Robinson), 149.
- Bicoecidae (Picken), 451.
- Colours of *Metridium senile* (Fox and Pantin), 415.
- Dogfish, studies on reproduction (Metten), 217.
- Flight of *Muscina stabulans* (Hollick), 357.
- Fox, D. L. and Pantin, C. F. A. The colours of the plumose anemone *Metridium senile* (L), 415.
- Godwin, H. Studies of the post-glacial history of British vegetation, III, IV, 239.
- Hollick, F. S. J. The flight of the dipterous fly *Muscina stabulans* Fallén, 357.
- Hyaena, reproduction (Matthews), 1.
- Lawrence, W. J. C., Price, J. R., Robinson, G. M. and Robinson, R. The distribution of anthocyanins in flowers, fruits and leaves, 149.
- Mammalian palate, evolution of (Parrington and Westoll), 305.
- Manton, I. Evidence on spiral structure and chromosome pairing in *Osmunda regalis* L, 179.
- Matthews, L. Reproduction in the spotted hyaena *Crocuta crocuta* (Erxleben), 1.
- Metridium senile*, colours (Fox and Pantin), 415.
- Metten, H. Studies on the reproduction of the dogfish, 217.
- Moy-Thomas, J. A. The Devonian fish *Palaeospondylus gunni* Traquair, 391.
- Osmunda regalis*, spiral structure and chromosome pairing (Manton), 179.
- Palaeospondylus* (Moy-Thomas), 391.
- Pantin, C. F. A. *See* Fox and Pantin.
- Parrington, F. R. and Westoll, T. S. On the evolution of the mammalian palate, 305.
- Picken, L. E. R. On the Bicoecidae: a family of colourless flagellates, 451.
- Post-glacial history of British vegetation (Godwin), 239.
- Price, J. R. *See* Lawrence and others.
- Protobranchiate mollusca (Yonge), 79.
- Robinson, G. M. *See* Lawrence and others.
- Robinson, R. *See* Lawrence and others.
- Westoll, T. S. *See* Parrington and Westoll.
- Yonge, C. M. The protobranchiate mollusca; a functional interpretation of their structure and evolution, 79.

CONTENTS

Series B Volume 230

Reproduction in the spotted hyaena <i>Crocuta crocuta</i> (Erxleben). By L. H. MATTHEWS. (Plates 1-14)	page 1
The protobranchiate mollusca; a functional interpretation of their structure and evolution. By C. M. YONGE. (Plate 15)	79
The distribution of anthocyanins in flowers, fruits and leaves. By W. J. C. LAWRENCE, J. R. PRICE, G. M. ROBINSON and R. ROBINSON, F.R.S.	149
Evidence on spiral structure and chromosome pairing in <i>Osmunda regalis</i> L. By I. MANTON. (Plates 16-19)	179
Studies on the reproduction of the dogfish. By H. METTEN. (Plate 20).	217
Studies of the post-glacial history of British vegetation. III. Fenland pollen diagrams. IV. Post-glacial changes of relative land- and sea-level in the English fenland. By H. GODWIN. (Plate 21)	239
On the evolution of the mammalian palate. By F. R. PARRINGTON and T. S. WESTOLL	305
The flight of the dipterous fly <i>Muscina stabulans</i> Fallén. By F. S. J. HOLLICK	357
The Devonian fish <i>Palaeospondylus gunni</i> Traquair. By J. A. MOY-THOMAS. (Plates 22-25)	391
The colours of the plumose anemone <i>Metridium senile</i> (L.). By D. L. FOX and C. F. A. PANTIN, F.R.S.	415
On the Bicoecidae: a family of colourless flagellates. By L. E. R. PICKEN. (Plate 26)	451
Index	474

ADVERTISEMENT

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions* take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume; the Society, as a Body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind: the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them: without pretending to answer for the certainty of the facts, or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.
