

INDEXES TO VOLUME 301 (B)

Author index

- Aldred, R. G., Nixon, Marion & Young, J. Z. *Cirrothauma murrayi* Chun, a finned octopod, 1.
- Armstrong, W. G., Halstead, L. B., Reed, F. B. & Wood, Liliana. Fossil proteins in vertebrate calcified tissues, 301.
- Batson, B. S. *Tetrahymena dimorpha* sp.nov. (Hymenostomatida: Tetrahymenidae), a new ciliate parasite of Simuliidae (Diptera) with potential as a model for the study of ciliate morphogenesis, 345.
- Bruton, D. L. & Whittington, H. B. Erratum: *Phil. Trans. R. Soc. Lond. B* **300**, 553–583 (1983), 430.
- de Ceccatty, M. P. *See* Mackie *et al.*
- Ford, D. C. *See* Gascoyne *et al.*
- Gascoyne, M., Schwarcz, H. P. & Ford, D. C. Uranium-series ages of speleothem from northwest England: correlation with Quaternary climate, 143.
- Halstead, L. B. *See* Armstrong *et al.*
- Kitching, J. A. & Thain, Vivien M. Erratum: *Phil. Trans. R. Soc. Lond. B* **300**, 513–552 (1983), 429.
- Lawn, I. D. *See* Mackie *et al.*
- Lieberman, A. R. *See* Parnavelas *et al.*
- Luder, R. *See* Parnavelas *et al.*
- Mackie, G. O. *See* Reiswig & Mackie.
- Mackie, G. O., Lawn, I. D. & de Ceccatty, M. P. Studies on hexactinellid sponges. II. Excitability, conduction and coordination of responses in *Rhabdocalyptus dawsoni* (Lambe, 1873), 401.
- Mackie, G. O. & Singla, C. L. Studies on hexactinellid sponges. I. Histology of *Rhabdocalyptus dawsoni* (Lambe, 1873), 365.
- Nixon, Marion. *See* Aldred *et al.*
- Parnavelas, J. G., Luder, R., Pollard, S. G., Sullivan, K. & Lieberman, A. R. A qualitative and quantitative ultrastructural study of glial cells in the developing visual cortex of the rat, 55.
- Pollard, S. G. *See* Parnavelas *et al.*
- Pugh, P. R. Benthic siphonophores: a review of the family Rhodaliidae (*Siphonophora*, *Physonectae*), 165.
- Reed, F. B. *See* Armstrong *et al.*
- Reiswig, H. M. & Mackie, G. O. Studies on hexactinellid sponges. III. The taxonomic status of Hexactinellida within the Porifera, 419.
- Schwarcz, H. P. *See* Gascoyne *et al.*
- Singla, C. L. *See* Mackie & Singla.
- Stanton, M. G. Origin and magnitude of transmembrane resting potential in living cells, 85.
- Sullivan, K. *See* Parnavelas *et al.*
- Thain, Vivien M. *See* Kitching & Thain.
- Whittington, H. B. *See* Bruton & Whittington.
- Wood, Liliana. *See* Armstrong *et al.*
- Young, J. Z. *See* Aldred *et al.*

Subject index

Benthic siphonophores, 165.

Ciliate morphogenesis, *Tetrahymena dimorpha* sp.nov. as a new model, 345.

Cirrothauma murrayi (Cephalopoda), 1.

Fossil, protein, 301.

Glial cells in the developing visual cortex of the rat. A qualitative and quantitative ultrastructural study, 55.

Hexactinellida, behavioural physiology, 401.

Hexactinellida, taxonomic position of, 419.

Hexactinellida, ultrastructure, 365.

Membrane potential, origin and magnitude of, 85.

Octopod, finned cirrate, 1.

Porifera, new subphyla proposed: Symplasma and Cellularia, 419.

Protein, fossil, 301.

Resting potential, origin and magnitude of, 85.

Rhodaliid siphonophores, 165.

Speleothem ages, northwest England, 143.

Tetrahymena dimorpha sp.nov., a new ciliate parasite in Simuliidae (Diptera), 345.

Uranium-series ages of speleothem, 143.

Visual cortex. A qualitative and quantitative study of glial cells in the developing, 55

CONTENTS

Series B Volume 301

No. 1103 26 April 1983

Cirrothauma murrayi Chun, a finned octopod

By R. G. ALDRED, MARION NIXON and J. Z. YOUNG, F.R.S. [Plates 1-21] . . . page 1

A qualitative and quantitative ultrastructural study of glial cells in the developing visual cortex of the rat

By J. G. PARNAVELAS, R. LUDER, S. G. POLLARD, K. SULLIVAN and A. R. LIEBERMAN [Plates 1-18] 55

No. 1104 24 May 1983

Origin and magnitude of transmembrane resting potential in living cells

By M. G. STANTON 85

Uranium-series ages of speleothem from northwest England: correlation with Quaternary climate

By M. GASCOYNE, H. P. SCHWARCZ and D. C. FORD. [Plate 1] 143

No. 1105 14 June 1983

Benthic siphonophores: a review of the family Rhodaliidae (Siphonophora, Physonectae)

By P. R. PUGH. [Plates 1-16] 165

No. 1106 14 June 1983

Fossil proteins in vertebrate calcified tissues

By W. G. ARMSTRONG, L. B. HALSTEAD, F. B. REED and LILIANA WOOD. [Plate 1] 301

Tetrahymena dimorpha sp.nov. (Hymenostomatida: Tetrahymenidae), a new ciliate parasite of Simuliidae (Diptera) with potential as a model for the study of ciliate morphogenesis

By B. S. BATSON. [Plates 1-7] 345

No. 1107 5 July 1983

Studies on hexactinellid sponges. I. Histology of *Rhabdocalyptus dawsoni* (Lambe, 1873)

By G. O. MACKIE and C. L. SINGLA. [Plates 1-12] 365

Studies on hexactinellid sponges. II. Excitability, conduction and coordination of responses in *Rhabdocalyptus dawsoni* (Lambe, 1873)

By G. O. MACKIE, I. D. LAWN and M. PAVANS DE CECCATTY 401

Studies on hexactinellid sponges. III. The taxonomic status of Hexactinellida within the porifera

By H. M. REISWIG and G. O. MACKIE 419

Erratum

QUANTITIES, UNITS, AND SYMBOLS

Second edition 1975

54 pages 250 x 176 mm. Paper cover only

ISBN 0 85403 071 9

	U.K.	Overseas	T
Price	£1.00	£1.05	

This handbook contains in a convenient form a very great deal of information on SI (the International System of Units), symbols for physical quantities, recommended forms for many aspects of scientific writing including mathematical presentation, labelling of graphs and tables, preferred placements and type fonts for subscripts and superscripts, favoured abbreviations, etc. It also includes recommended values of physical constants. While SI and other internationally recommended practices are emphasized, values of conversion factors are given for use with imperial units and other units outside SI. References to original international authority are quoted.

Its compact size makes *Quantities, Units, and Symbols* an invaluable aid for scientific writing for all authors who wish to follow modern practice especially in physics and chemistry. Equally it should be an immediately available guide for teachers in higher education many of whom will wish their students to own a copy. It is also invaluable for the reader who has found some unfamiliar notation or terminology, not least when he has strayed from his own narrow specialism.

The contents include:

- Physical quantities and symbols for physical quantities
- Units and symbols for units
- Numbers
- Recommended mathematical symbols
- Chemical elements, nuclides, and particles
- Quantum states
- Nuclear physics
- Thermodynamic results
- Galvanic cells
- Some common abbreviations
- Recommended values of physical constants
- Sources
- Bibliography

To encourage the widespread availability and use of Q.U.S. (as it is commonly known) the following special prices are offered for orders for multiple copies:

	U.K.	Overseas
5 copies	£4.00	£4.15
10 copies	£6.50	£6.70
20 copies	£11.00	£11.35
50 copies	£22.50	£23.20
