Inorganic and organic radicals: their biological
and clinical relevance

A DISCUSSION ORGANIZED BY
R. O. C. NORMAN, F.R.S., AND H. A. O. HILL
AND EDITED BY H. A. O. HILL

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG

PROCEEDINGS AND PHILOSOPHICAL TRANSACTIONS OF THE ROYAL SOCIETY

Notice to contributors

The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the *Proceedings* and longer papers and those with numerous or large illustrations for the *Philosophical Transactions*.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The 'Instructions to authors' are also printed in every fifth volume of the *Proceedings* A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper. A leaflet giving detailed advice on the preparation of illustrations is available from the Executive Secretary; diagrams should be expertly drawn at about twice the proposed final size, preferably with lettering in the correct style but if this is not possible the lettering should be inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper must be through a Fellow or Foreign Member of the Society, but subsequent correspondence will be conducted direct with the author. The latest lists of Fellows and Foreign Members are to be found in the current edition of the *Year Book of the Royal Society*. A copy of 'Notes for the guidance of Fellows communicating papers' is available from the Executive Secretary. In the event of any difficulty, an author is invited to seek the assistance of the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

The Editors particularly welcome short communications to *Proceedings*; as far as possible they will be given expeditious treatment both in consideration and in printing, and this will be facilitated if a paper is submitted with a firm recommendation by a Fellow.

Associate Editors: series B, Biological Sciences

(For Standing Orders see current Year Book.)

It is the policy of the Royal Society not to charge any royalty for the production of a single copy of any one article made for private study or research. Requests for the copying or reprinting of any article for any other purpose should be sent to the Royal Society.

INORGANIC AND ORGANIC RADICALS: THEIR BIOLOGICAL AND CLINICAL RELEVANCE

A DISCUSSION ORGANIZED BY
R. O. C. NORMAN, F.R.S., AND H. A. O. HILL
AND EDITED BY H. A. O. HILL

(Discussion held 30 and 31 January 1985 - Typescripts received 12 April 1985)

CONTENTS

RADICAL REACTIONS

	PAGE
M. C. R. SYMONS	
Inorganic radicals of relevance to biological systems	451
<i>Discussion</i> : H. SIES	472
B. H. J. BIELSKI	
Fast kinetic studies of dioxygen-derived species and their metal complexes	473
<i>Discussion</i> : R. L. WILLSON	482
D. T. SAWYER, J. L. ROBERTS, JR, T. S. CALDERWOOD, H. SUGIMOTO AND M. S. MCDOWELL	
Reactivity and activation of dioxygen-derived species in aprotic media (a model matrix for biomembranes)	483
<i>Discussion</i> : P. WARDMAN	503
SIR DEREK BARTON, F.R.S., AND S. Z. ZARD	
Radicals: their importance in synthetic chemistry and their relevance to biology	505
M. FITCHETT, B. C. GILBERT AND M. JEFF	
Chemical models and radiation damage	517
<i>Discussion</i> : B. J. PARSONS, CATHERINE RICE-EVANS, R. L. WILLSON	528
RUTH M. DIXON, B. T. GOLDING, S. MWESIGYE-KIBENDE AND D. N. RAMA- KRISHNA RAO	
Concerning the intermediacy of organic radicals in vitamin B ₁₂ -dependent enzymic reactions	531
R. L. WILLSON, CHRISTINA A. DUNSTER, L. G. FORNI, CAROLYN A. GEE AND KATHERINE J. KITTRIDGE	
Organic free radicals and proteins in biochemical injury: electron- or hydrogen- transfer reactions?	545
<i>Discussion</i> : H. SIES, G. SCOTT	562

G. W. BURTON, D. O. FOSTER, B. PERLY, T. F. SLATER, I. C. P. SMITH AND K. U. INGOLD, F.R.S.	
Biological antioxidants	565
<i>Discussion</i> : R. L. WILLSON, G. SCOTT	576
D. DOLPHIN	
Cytochrome P ₄₅₀ : substrate and prosthetic-group free radicals generated during the enzymatic cycle	579

BIOLOGICAL ASPECTS OF RADICAL CHEMISTRY

R. J. P. WILLIAMS, F.R.S.	
The necessary and the desirable production of radicals in biology	593
<i>Discussion</i> : E. C. BAUGHAN, R. L. WILLSON	602
H. A. O. HILL	
Dioxygen-derived radicals in biological systems	605
<i>Discussion</i> : CATHERINE RICE-EVANS	615
H. SIES AND E. CADENAS	
Oxidative stress: damage to intact cells and organs	617
<i>Discussion</i> : M. C. R. SYMONS, G. SCOTT	629
T. F. SLATER, K. H. CHEESEMAN AND K. U. INGOLD, F.R.S.	
Carbon tetrachloride toxicity as a model for studying free-radical mediated liver injury	633
<i>Discussion</i> : CATHERINE RICE-EVANS, H. SIES	644

RADICALS AND THEIR PHYSIOLOGICAL AND CLINICAL RELEVANCE

L. L. SMITH	
Paraquat toxicity	647
B. HALLIWELL, J. M. C. GUTTERIDGE AND D. BLAKE	
Metal ions and oxygen radical reactions in human inflammatory joint disease	659
<i>Discussion</i> : ROBERTA J. WARD, P. M. MAY, H. SIES	670
S. ORRENIUS	
Oxidative stress studied in intact mammalian cells	673
<i>Discussion</i> : H. SIES	677
P. A. RILEY	
Radicals and melanomas	679
<i>Discussion</i> : R. MARRIS	689
