

Evolution of parental effects: conceptual issues and empirical patterns

Papers of a Theme Issue compiled and edited by Tobias Uller, Erik Wapstra and Alexander V. Badyaev

Introduction

- Evolution of maternal effects: past and present** 1035
T. A. Mousseau, T. Uller, E. Wapstra & A. V. Badyaev

Articles

- Reproductive investment when mate quality varies: differential allocation versus reproductive compensation** 1039
W. E. Harris & T. Uller
- The influence of context-dependent maternal effects on population dynamics: an experimental test** 1049
S. J. Plaistow & T. G. Benton
- Completing the cycle: maternal effects as the missing link in plant life histories** 1059
K. Donohue
- Maternal effects and range expansion: a key factor in a dynamic process?** 1075
R. A. Duckworth
- Coping with environmental uncertainty: dynamic bet hedging as a maternal effect** 1087
A. J. Crean & D. J. Marshall
- Beyond size–number trade-offs: clutch size as a maternal effect** 1097
G. P. Brown & R. Shine
- What are maternal effects (and what are they not)?** 1107
J. B. Wolf & M. J. Wade
- Maternal effects mechanism of population cycling: a formidable competitor to the traditional predator–prey view** 1117
P. Inchausti & L. R. Ginzburg
- Evolutionary significance of phenotypic accommodation in novel environments: an empirical test of the Baldwin effect** 1125
A. V. Badyaev
- Maternal effects in cooperative breeders: from hymenopterans to humans** 1143
A. F. Russell & V. Lummaa
- Parental effects in ecology and evolution: mechanisms, processes and implications** 1169
A. V. Badyaev & T. Uller

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
