AIMS AND SCOPE

Each issue of *Phil. Trans. R. Soc. B* is devoted to a specific area of the biological sciences. This area will define a research frontier that is advancing rapidly, often bridging traditional disciplines. *Phil. Trans. R. Soc. B* is essential reading for scientists working across the biological sciences. In particular, the journal is focused on the following four cluster areas: **neuroscience and cognition; organismal and evolutionary biology; cell and developmental biology; and health and disease**. As well as theme issues, the journal publishes papers from the Royal Society's biological discussion meetings. For information on submitting a proposal for a theme issue, consult the journal's website at rstb.royalsocietypublishing.org.
