Correction to ‘Organic matter removal from mother liquor of gas field wastewater by electro-Fenton process with the addition of H\textsubscript{2}O\textsubscript{2}: effect of initial pH’

Yan Wang, Hui-qiang Li and Li-ming Ren

R. Soc. open sci. 6, 191304. (Published 11 December 2019). (doi:10.1098/rsos.191304)

This correction refers to errors in the labelling of the y-axis in figure 3. ENC and ELC were used in place of SEEC and SEPC. This has now been corrected.

Figure 3. Effect of the initial pH on (a) SEEC in EF process, (b) SEPC in EF process. Conditions: 500 ml ML-GFW; I = 2 A; period reversal time: 10 min; H\textsubscript{2}O\textsubscript{2}: 7 ml/30 min; reaction time: 3 h.
